

As your partner in health and your provider of high quality health care at a great value, EvergreenHealth is committed to pricing transparency. We offer the following information to help you understand the pricing of medical services received at one of our clinics. This information is most applicable if you have not met your deductible, if you are on a high deductible plan, or if you have no insurance.

If your insurance covers these costs, then it is just for your information. Please know that the costs reflected below are before discounts negotiated between your insurance company and EvergreenHealth are applied.

It is also important to note that new patient visits require additional work than established patient visits and therefore result in a higher cost. Please ask a member of our clinic staff if you need help determining which category you qualify for.

Charge for an office visit for a concern:

The complexity of your visit can vary from 1-5 with 1 being the simplest and 5 being the most complex. Because even simple concerns can vary, the complexity of the visit is not known until the end of the appointment. For instance, a cough could be a simple viral infection or pneumonia requiring hospitalization.

LEVEL	NEW PATIENT	ESTABLISHED PATIENT
Level 1	\$106	\$48
Level 2	\$180	\$105
Level 3	\$261	\$176
Level 4	\$398	\$259
Level 5	\$500	\$350

Charge for a preventive visit:

Pricing for preventive visits, including annual checkups and physicals, are based on age.

AGE	NEW PATIENT	ESTABLISHED PATIENT
< 1 year	\$266	\$240
1-4 years	\$278	\$256
5-11 years	\$290	\$255
12-17 years	\$328	\$280
18-39 years	\$317	\$286
40-64 years	\$368	\$305
65+	\$399	\$328

Possible additional costs:

Please be mindful that there may be charges for services in addition to your preventive visit. **For an established patient, this is estimated to range from \$98–\$321, based on the complexity of the service.**

Even if your preventive visit is covered 100 percent by your insurance, there may be charges for additional tests. It is important to understand your insurance coverage, know what services are and are not covered and determine what you will be responsible for paying “out of pocket.”

Below, please find the additional costs for services that are not included in the preventive visit for most people.

COST	SERVICE
\$70-\$136	Chest x-ray, in the clinic setting
\$41.00	EKG
\$44.00	Blood test: complete blood count (CBC)
\$48.00	Blood test: complete metabolic panel (CMP)
\$44.00	Blood test: cholesterol test (lipid panel)
\$45.00	Blood test: thyroid test (TSH)
\$6-\$19	Test done in the office (i.e. urine tests)
\$269	Freezing warts (1-14 warts)
\$319	Freezing warts (15 or more)
\$269 - \$319	Freezing benign lesions
\$162	Freezing precancerous lesion; \$14 for each additional lesion up to 14
\$365	Freezing 15 or more precancerous lesions
